

STRATEGIC PROPOSAL

Halalverse Qatar Platform

A QFC-led Strategic Initiative

Qatar Financial Centre is entering a defining phase in its evolution as a global financial hub.

With strong regulatory infrastructure, a growing fintech ecosystem, and increasing global relevance in Islamic finance, the opportunity is no longer limited to building capability — it is to shape global positioning and influence.

The proposed Halalverse Qatar Platform is a QFC-led initiative designed to:

- position Qatar as a global hub for Islamic fintech and financial innovation
- activate a high-quality ecosystem of institutions, investors, and market participants
- create structured pathways for cross-border engagement, partnerships, and capital flow

This is not a series of events.

It is a continuous platform of engagement, designed to strengthen Qatar's global presence and ecosystem relevance.

2 – STRATEGIC ALIGNMENT

This initiative directly supports Qatar Financial Centre's broader strategic priorities and Qatar's national economic direction.

It aligns with:

- Qatar National Vision 2030
- QFC's focus on fintech, Islamic finance, and digital innovation
- emerging priorities around digital assets and financial infrastructure

The platform acts as an activation layer for these priorities — translating infrastructure and policy into visible global engagement.

A timeline of evolution.

The global Islamic finance and fintech landscape is undergoing a structural shift.

- Islamic fintech is expanding across multiple regions
- digital assets and tokenization are reshaping capital markets
- financial centres are actively competing for positioning in these domains

QFC has already established the regulatory and institutional foundation.

The opportunity now is time-sensitive:

→ to establish leadership before positioning consolidates elsewhere

Halalverse operates at the intersection of:

- Islamic finance
- emerging technologies (AI, blockchain, digital assets)
- global market ecosystems

It has evolved from a series of focused forums into a structured platform designed to:

- connect capital, companies, and institutions
- facilitate strategic engagement
- support cross-border market expansion

Its operating philosophy is based on:

→ quality over scale

→ curation over volume

→ execution over visibility

A sequence of focused initiatives.

Halalverse has developed through a sequence of focused initiatives:

- Blockchain for Islamic Finance Summit (BIB)
- World Islamic Fintech Forum
- World DeFi & NFT Summit
- Halalverse (Web3 & Impact)
- Sustex (Technology & Sustainability)
- World Token Summit (RWA Tokenization)

This progression reflects a clear evolution:

from event-led engagement → to ecosystem platform

with consistent focus on Islamic finance, technology, and capital markets.

Qatar has the infrastructure, regulatory clarity, and institutional strength.

The next step is to establish:

→ a global convening layer

Through a structured platform, Qatar can become:

- a reference point for Islamic fintech
- a hub for capital markets dialogue and innovation
- a meeting ground for institutions, investors, and technology providers

This is both a positioning opportunity and an ecosystem opportunity.

Despite strong foundations, there is currently:

- no continuous global platform anchored in Qatar
- limited structured engagement across international ecosystems
- fragmented visibility in global Islamic finance dialogue

As a result:

→ Qatar participates in global discussions

→ but does not consistently host them

A QFC-led initiative designed to create a continuous ecosystem loop.

GLOBAL FORUMS → EXECUTIVE ENGAGEMENT → GLOBAL OUTREACH → DEAL FLOW →
TRAINING → REPEAT

This structure ensures:

- continuity of engagement
- ecosystem depth
- long-term positioning

9 – GLOBAL FORUM SERIES

All flagship forums hosted in Qatar.

Islamic Fintech Forum

FOCUS digital banking, fintech infrastructure, AI in finance

OUTCOME → institutional collaboration and innovation alignment

Global Sukuk Forum

FOCUS Islamic capital markets, structuring, and future instruments

OUTCOME → strengthened capital markets positioning

World Islamic Economy Forum

FOCUS cross-sector engagement across finance, trade, and technology

OUTCOME → global economic positioning

→ QATAR AS THE HOST OF THE GLOBAL ISLAMIC ECONOMY CONVERSATION

A continuous platform of engagement.

THIS STRUCTURE ENSURES CONTINUITY OF ENGAGEMENT, ECOSYSTEM DEPTH, AND LONG-TERM POSITIONING.

The platform extends beyond forums.

Year-round engagement through structured initiatives.

Executive Roundtables

Closed-door, high-level institutional engagement.

Global Roadshows

Targeted international outreach to attract companies and capital.

Executive Training

Programs for banks, regulators, and institutions.

Deal Flow Facilitation

Structured pathways for partnerships and market access.

MARKET ENGAGEMENT SIGNALS

Initial discussions indicate early interest from:

- fintech firms in Southeast Asia exploring GCC expansion
- GCC-based investors and family offices evaluating structured deal access
- infrastructure and technology providers seeking regulated market entry

These signals reinforce the relevance of a Qatar-based platform.

Qatar's positioning offers a differentiated advantage.

- strong regulatory framework
- institutional credibility
- neutral and globally connected positioning
- alignment with sovereign and long-term economic strategy

This enables Qatar to act as:

→ a trusted and stable platform for global Islamic finance engagement

Global Positioning	Recognition as a leading hub for Islamic fintech and financial innovation.
Ecosystem Growth	Attraction of high-quality institutions and market participants.
Strategic Engagement	Meaningful partnerships and cross-border collaboration.
Competitive Advantage	Stronger positioning relative to other financial centres.
Platform Ownership	QFC anchors a long-term ecosystem, not a one-off initiative.

EXPECTED OUTCOMES

The platform is designed to deliver:

- senior-level engagement across financial institutions, regulators, investors, and technology providers
- high-value institutional dialogue and collaboration opportunities
- a structured pipeline of cross-border engagement and capital discussions
- strengthened positioning of Qatar as a global hub for Islamic finance and fintech

The emphasis is on quality, relevance, and strategic impact.

QFC-led | Halalverse as Strategic Execution Partner.

QFC

- strategic leadership
- branding and positioning
- regulatory alignment
- stakeholder access

Halalverse

- program design
- global outreach
- participant curation
- end-to-end execution
- ecosystem coordination

To ensure institutional alignment.

- participation will be curated for quality and relevance
- engagements will align with QFC priorities
- all activities will operate within QFC's regulatory and brand framework

A structured governance approach ensures:

→ **credibility**

→ **control**

→ **long-term trust**

Two structured engagement models.

Model A — Strategic Platform Partnership

RECOMMENDED

A long-term platform engagement with participation in ecosystem value creation.

- full platform execution
- year-round ecosystem activation
- alignment with long-term strategic positioning

QFC participates in the economic upside of the platform across:

- forums
- training
- ecosystem partnerships

Model B — Program Engagement

A defined execution-focused model:

- structured scope
- flexible engagement
- no participation in platform economics

VALUE PERSPECTIVE

This initiative should be viewed as:

→ ecosystem infrastructure

→ platform investment

not standalone event cost

not short-term marketing activity

Halalverse combines structure, network, and execution.

- domain focus across Islamic finance and emerging technology
- experience in building high-level forums
- global ecosystem connectivity
- execution capability across multiple markets

→ STRUCTURE + NETWORK + EXECUTION

17 — FUTURE VISION

This initiative begins with Qatar.

Over time, it can evolve into a connected ecosystem across multiple markets.

Qatar becomes:

→ THE ORIGIN AND ANCHOR OF A BROADER GLOBAL PLATFORM

18 — NEXT STEPS

01 strategic alignment discussion

02 scope refinement

03 partnership confirmation

04 program initiation

FINAL POSITIONING

QFC-led. Halalverse executed. Qatar positioned.

This initiative enables Qatar Financial Centre to move from participation to leadership — establishing a platform that strengthens its global relevance and ecosystem impact.
